with Lisa McCullough

GENEALOGICAL FORUM OF OREGON

YOU SWABBED/ YOU SPIT/ WHAT'S NEXT?

You convinced your relatives to DNA test at recent holiday get-togethers, and sent the samples back to their labs for processing. While you wait for the results, join us at the GFO, where Lisa McCullough will walk us through the next steps. If you want more out of your DNA results than just an ethnicity estimate, you do not want to miss this presentation!

Lisa McCullough specializes in genetic genealogy. She holds a B.S. in Electrical Engineering, is an FTDNA project administrator, has pursued advanced DNA continuing education at national institutes, and leads the DNA Q&A interest group at the GFO. Lisa has taught classes and given presentations at several genealogy societies throughout the Pacific Northwest.
