

SATURDAY
FEB. 16

2 - 3 P.M.

WE'RE TRYING SOMETHING NEW

Have you ever watched someone do something amazing on the computer, but when you tried it yourself it somehow just didn't work? Or maybe you didn't even try because it seemed like teaching calculus to a panda bear.

What we'd like to do at our February GenTalk is practice doing some of those amazing things until you *can* do it yourself.

BRING YOUR COMPUTER, OR USE ONE OF OURS

The best way to learn to use a computer is to ... use a computer. This GenTalk Computer Lab will address beginning and early-intermediate online genealogy research techniques with Google by walking you through the process, click by click. Whether you have a Mac or PC, Kristin (Mac) and Joann (PC) will be there to help you.

If you have a laptop of your own, please bring it! If you do not, then sign up to use one at the GFO.

GenTalks are free and open to everyone, but the number of GFO computers is limited, so please register online to use one.

KRISTIN PARKS

GFO Education Committee Chair, Research Assistant, and researcher for GPS SIG. Mac user.

RESERVE A GFO COMPUTER

Please bring your laptop if you have one. If not, go to GFO.org > Learn > GenTalks to reserve one of ours.

JOANN TAYLOR

GFO Research & Look-Up Services volunteer, Research Assistant, and researcher for GPS SIG. PC user.
