

GENTALK @ GFO

Computer Lab: **Intro to Excel® for Genealogy**

Taught by Kendra Blumberg

**Sat., Feb. 15
2 - 3 p.m.**

Free & open to the public

Get ready for the upcoming 3-hour, hands-on Excel® for genealogy workshop with Mary Kircher Roddy on Feb. 23 at the GFO Library!

Sometimes having too much data is as confusing as having too little, and it is easy to get overwhelmed. Spreadsheets are a powerful tool for analyzing your data, organizing your research and presenting your conclusions. But as with any tool, you have to know how to use it to get results.

Please bring your laptop with Excel® loaded. Otherwise, a limited number of computers are available for free reservation at gfo.org/computer.

Kendra Blumberg, a GFO member and volunteer, has researched her family history for decades, and has found ample opportunity to learn how to make spreadsheets work for her. Kendra is Microsoft-certified in Excel®, uses the program professionally, and is eager to teach beginners how to get started using it for genealogy.
